

## PD3988 Pointer Excel II 探穴治療止痛筆(附數字顯示)

The Pointer Plus Excel II is a newly developed user friendly hand held device with digital display for location of acupuncture or trigger point, and incorporates an effective push button stimulation feature for immediate treatment of the point or area right after its detection.

The digital display helps the user to locate the most accurate acupuncture or trigger point easily, as the number increases with the lowering of the electric resistance of the skin, and when a maximum number is reached, an acupuncture point is detected.

Further, this new device is added with more features, such as adjustable frequency from 1 ~ 16 Hz, and polarity reversal switch (for tonification or sedation), and point detection sound adjustment.

### Features and specifications

- Normal output for direct stimulation 0~22 mA r.m.s.
- Micro-current output (marked on the dial) 0~2 mA r.m.s.
- Sensitivity adjustment control
- Adjustable output intensity control
- Point detection sound adjustment
- Frequency adjustment control 1~16 Hz
- Polarity reversal switch (+ve /-ve)
- Pulse width 220  $\mu$ sec
- Waveform: continuous
- Acupuncture Point detection
- Large LCD digital display sensitivity and frequency reading
- Push button for direct electric stimulation
- Pilot lamp to indicate point detection and stimulation
- Buzzer in producing audio signal during point detection
- Two metal plates for closing circuit
- ABS casing
- Power supply: 9V battery

### Accessories:

- Hand electrode for close circuit purpose
- Two probes, diameter 2 mm & 4 mm
- Screw driver
- 9V Heavy Duty battery
- Instruction Manual
- Acupuncture chart
- The unit and its accessories are packed in a hard ABS plastic carrying case.
